Ahmed Abdelaziz Hanafy

Software Engineer (Systems & Backend Engineer)

Email: 2004.sanfor@gmail.com **LinkedIn:** linkedin.com/in/Sanfor2004 **GitHub:** github.com/Sanfor2004
TryHackMe: tryhackme.com/p/sanfor2004 **Portfolio:** sanfor2004.github.io

SUMMARY

Systems & Backend Engineer focused on building reliable backend services and infrastructure. Experienced in designing APIs, automation workflows, integrations, and database-backed applications using Node.js, Python, PHP, SQL, and C/C++. Strong hands-on background in Linux, Docker, networking, performance optimization, and troubleshooting production systems. Comfortable taking products from idea to deployment, improving stability, and solving practical technical problems.

WORK EXPERIENCE

Full Stack Software Engineer - Skylimit LLC

Sacramento, California, USA (Remote) Dec 2022 – Feb 2026

- Built a lead-generation loan platform from scratch that delivered 5.4M+ leads, processed 53,341+ orders, and generated over $1.35M in revenue from 2,305 users.
- Engineered an integration layer using Twilio, Plivo, and Stripe that handled 339,000+ messages and calls per month and processed $156,140 in online payments.
- Developed a data-cleaning process that reduced duplicate and bad records by 83%, improving lead quality and business reporting.
- Led and mentored a small team of 2 developers, coordinating tasks, reviewing code, and communicating with clients to deliver projects on time.
- Rebuilt the main web platform for better speed and maintainability and enhanced automated voice-response (IVR) systems to reduce dropped and failed calls.
- Built eRateApp.com, a school collaboration platform with document upload/viewing, an admin dashboard, and financial reporting, adopted by 200+ schools within 2 months.

Software Engineer (Freelance) - Fiverr

Alexandria, Egypt (Remote) Mar 2021 – Dec 2022

- Delivered 7 custom software and automation projects and 3 consulting projects for 10+ international clients, communicating directly to gather requirements and providing technical consulting.
- Achieved a 5-star client rating and built a strong portfolio, which led to a full-time role at Skylimit LLC.

SKILLS

- **Programming:** C, C++, Python, JavaScript, TypeScript, PHP, SQL
- **Backend Engineering:** Node.js, Python, PHP, Laravel, Django, REST APIs, WebSocket, SSE, OAuth
- **Data Structures & Algorithms:** Problem solving, algorithm design, complexity analysis
- **Systems & Infrastructure:** Linux, Docker, AWS, Google Cloud, networking, performance optimization, Git
- **Databases & Architecture:** MySQL, PostgreSQL, MongoDB, Google Cloud SQL, Prisma, system design
- **Integrations & Automation:** Twilio, Plivo, Stripe, Telnyx, webhooks, payment and communication
- **Soft Skills**: Communication, Team Collaboration, Problem-Solving, Adaptability, Client Relations

PROJECTS

XGS (Python) - reconnaissance and Dorking utility for standard and onion websites, with 60+ GitHub stars.

XCVE (Python) - security utility that connects to CVE.MITRE.ORG for fast CVE lookup and vulnerability research.

php-hls-streamer (PHP, FFmpeg) - streaming backend that uses FFmpeg to deliver HLS video for browser playback.
Multi-Region-Tag-Translator-i18n (JavaScript, PHP) - Public i18n project for dynamic multi-region content delivery.

EDUCATION

Bachelor's degree in business information systems

Alexandria University - Alexandria, Egypt

LANGUAGES

Arabic (Native) - English (Upper Intermediate)
